

Angle-seat valves with external pilot control and a self-aligning valve disc. Suitable for neutral or aggressive gaseous or liquid media that are compatible with the materials used.

Angle-seat valve with pneumatically operated piston actuator, single-acting (normally closed).
 Fluid entry under the piston.
 Any mounting position.

- Very high flow due to angled seat design
- Water hammer prevented by fluid entry under the disc
- Suitable for vacuum operation (low vacuum)
- Max. viscosity 600 cSt
- Maintenance-free pilot head
- The fixed direction of flow means that no pressure surges occur when the valve is operated
- Self-aligning sealing plate guarantees tight closing

Medium temperature	-10 °C to 180 °C
Ambient temperature	-20 °C to 70 °C
Differential pressure	0 - 16 bar
Permissible static pressure max.	16 bar
Pilot fluid temperature max.	60 °C
Housing	Stainless steel AISI 316
Sealant	PTFE
Stem	Stainless steel
Operator	Polyamide (glass fibre-reinforced)
Connectors	Stainless steel
Control air port	G 1/8
Piston	Nickel-plated brass
Pilot pressure min.	4 bar
Pilot pressure max.	10 bar
